ÇANKAYA ÜNİVERSİTESİ

Arch 427 Architectural Engineering & Env. Systems

Assignment -1

Research on a complex building (i.e. airports, hosptals, etc.)

Report:

It is expecting from you to consider all the information gained during the lecture and prepare a report which introduces a complex building i.e. Airport terminals, hospitals, etc.

The report should have a title page stated your name, lecture's title, building's title, and date.

Explain the project's main idea briefly. The site, climate, function, space organisation, building envelope, building systems, etc. should be introduced clearly. The explanations will be supported by drawings, sketches, etc.

The report should include a conclusion and discussion part. Criticise the building from the integrated design approach perspective.

The reports will be written on an A4 paper in a good structured technical English.

Deliverables: One Report: minimum 1000 words.

Due Date: 24 March 2016
Grading: 20 points possible
